

The Peterson Companies and Mister Kleen Partner for Gold and Silver!

In our world where “green” is a very important initiative, we are pleased to announce that The Peterson Companies has attained the LEED (Leadership in Energy and Environmental Design) Certification of Gold and Silver at two Northern Virginia Government facilities. LEED is a third-party certification program and the nationally accepted benchmark for the design, construction and operation of high performance green buildings. Acquiring certification is twofold on newly constructed buildings. First they must comply with the construction requirements such as Design Elements, HVAC Operations, Sustainable Sites, Materials and Resources and Water Efficiency to name a few. The second part is maintaining these standards after construction. This is where Mister Kleen’s partnership with The Peterson Companies plays a role. Mister Kleen helps maintain the facilities day to day with such activities as a robust recycle program, indoor air quality controls and utilization of green cleaning products and equipment. According to Mr. Kevin Donohoe, Director of Commercial Property Management, “We have one of the best partnerships with Mister Kleen Maintenance Company in that they service the client’s green needs, integrity is utmost and it’s a very comfortable fit.” We are extremely proud of our partnership with The Peterson Companies and we congratulate them and their entire team, to include Anita Minehart, RPA, Property Manager and Brian Gault, Director of Sustainable Development on their hard work and success.
